E911 Status – Quarterly Report

CC Docket No. 94-102

May 1, 2007

Summary of Report

American Cellular Corporation,¹ a Tier II CMRS carrier, provides this E911 Quarterly Report (“Report”).² The Report provides information on all Phase I and Phase II requests received by ACC, including the PSAP ID, Name, State, County, Implementation Phase, Air Interface, Date PSAP Request Made, Date PSAP Request Withdrawn, Invalid Request, Deployed, Date Deployed, Date Projected, Reasons and Comment. Detailed information regarding the requests is contained in the attached chart.

Phase I Service

Since the last quarterly filing, ACC has received new requests for Phase I service for PSAPs in Bradford County, PA and Langlade County, WI. ACC has worked diligently with its third-party vendor Intrado, as well as the public safety community, in coordinating Phase I deployment. ACC remains committed to working with its vendors, the PSAPs, and state and local governments, in order to deploy Phase I services on a timely basis.

Phase II Service

A. Deployment Preparation

ACC is a mid-sized carrier serving predominantly rural and suburban markets in thirteen states. ACC previously relied primarily upon a TDMA-based network of base stations and switching equipment, but has since completed overlaying its TDMA network with GSM/GPRS technology. ACC has worked with equipment vendors to deploy a network-based Phase II E911 solution. ACC has executed a contract with Andrew Corporation to provide the Position Determining Entity equipment for a hardware solution for E911 Phase II and has also executed a contract with Polaris Wireless to provide a software solution for E911 Phase II.

¹ The instant Report is filed on behalf of American Cellular Corporation and its subsidiaries (collectively “ACC”). A separate report is being filed for Dobson Cellular Systems, Inc., which is an affiliate of ACC.

² See *Revision of the Commission’s Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, CC Docket No. 94-102, *Order to Stay*, 17 FCC Rcd 14841 (2002) (“*Order to Stay*”); *Public Notice*, “Wireless Telecommunications Bureau Standardizes Carrier Reporting on Wireless E911 Implementation,” DA 03-1902 (rel. June 6, 2003).

B. Phase II Requests

Since the last quarterly filing, ACC has continued to deploy the necessary software and hardware of the network-based Phase II solution from Polaris and/or Andrew in response to pending requests and ACC has received new requests for Phase II service for PSAPs in the following counties: Bradford, PA; Fayette, PA; Greene, PA; and Langlade, WI. To ensure that it may properly prioritize its E911 1-designated resources, ACC generally has requested each of these PSAPs to provide documentation pursuant to the *Richardson* criteria.³ ACC continues to work towards completing these Phase II requests pursuant to timetables that are mutually agreeable to the relevant PSAP. The status of all requests is detailed in the attachment.

C. Deployment Issues

ACC, as a rural carrier using a network-based Phase II solution, continues to face challenging deployment issues, all of which have been described in detail in previously filed quarterly reports. A copy of this report is being filed with the Chief of the Enforcement Bureau, the Chief of the Wireless Telecommunications Bureau, and the Executive Directors and Counsels of APCO, NENA, and NANSAs.
